This is a trip through everything that is eclectic and electric! My god this is a stunning array of tracks with a depth of quality I have seldom heard! The Kril Minima track - Gamelan is possibly one of the finest electronic music tracks I have ever heard?! Buy this release on sight...

This is honestly one of -the best- compilations of modern electronic music I've ever listened to. There's dub techno on it, for certain, but it's so much more than just that. The first track alone is a flawless fusion of electronic and organic sounds that's almost too good to be true, and as it dies away, you're thrown right into a beautiful ambient techno arrangement that doesn't sound trite or stale in any way whatsoever. It's amazing to me to find people who can still bring fresh ideas to the worlds of ambient and techno, and every artist on this compilation does it in some way or another. Highly recommended, even if you're not usually into dubby blends or chilled out grooves... You probably won't be dissapointed. Standout tracks: ICE, Shaping the Sky [Section II Edit], Owl-Light Chill, Gamelan, Lumen, Winter Sun and Veluwe ... But honestly the entire thing is thoroughly

enjoyable! If you can land yourself a copy of this, don't hesitate!
