Comments about **I Stridens Era...** - Gnipahålan

Flamekiller

This is probably one of the best black metal tapes i've heard the past years..Short it may be, but the dynamics and feeling here make up for it..Elements of early DHG in the vocal lines, fast guitar riffs like they popped up from the 90's Norwegian scene, tight compositions with short synth tracks as an intro and outro..What more can you ask for, just go for it..In general Gnipahalan deliver, big time.p.s.Worthy BM project to look for as wellThe Kryptik - Through Infinity Of Darkness Auridora

If someone have the original release that also was limited to 10 copies, please add it too.
