| 3 In A Heartbeat | 6:56 |

Notes

Adding some harmony to the Mind Field roster with the mystifying sounds of Warmth! Take a look out on the fast moving city and try to find something that moves you something that will keep you warm at night! The effortless music of Warmth should keep you company in times of need or simply for a relaxed Sunday Session Warmth is mainly working in the ambient zone as his name would suggest. His music has many influences but I think it is safe to say that it is simply mood enhancing music with melodic enriched depth 'When Lights Become Mirrors' and 'Late Night City Nature' gel really smoothly together and clearly all tracks in this EP including 'In a Heartbeat', are expressive in way that their names suggest! Perfect for opening a set, day-dreaming, floating or just being! Nice to hear these relaxed sounds introduced to the Mind Field palette.
